ML
30/7

4) The case is not yet ripe for orders. We do not yet know how the Mul. cl propose to finance their share of the cost of this rather Expensive scheme. A copy of the Chief Engineer's letter, the Executive Engineer's report in original and the Revised Estimates will have to be sent to the Mul. cl. and they should select the scheme most suitable to them, clearly indicating the mode of financing both the initial cost and the annual maintenance charges together with the formation of a Sinking fund for the repayment of any loans they may have to raise

5) If appd, a draft of the D. C. notes will then be put up and submitted. It is known a point for orders whether the Mulcy may be given to understand that Govt. will be prepared

Copies to Engr Mayhew sanctioned

To The Engineer of the Mly- to (1) That grant Rs 40000/ sanctioned for a fresh project to the town in G O No 2942-S Rul 341-08-838-1 be given to them in addition to the Contribution of half the cost of the Scheme (2) That a sum of Rs 3405-) be granted to them as a loan (3) That the existing impounding reservoir be taken over by Govt for irrigation purposes, as a set off against the balance of Rs 29765/ due by the Municipality Submitted with reference to para 7 Supra

MGH 20/10

Rul 21/10

The letter under disposal clearly explains the views of the Mul. Cl. The scheme as approved by the Mul Cl is estimated to cost Rs 253000/-. The Mly agrees to contribute a moiety of this sum but their method of financing is as follows:-

(i) Rs 52682 - This surplus balance

(ii) Rs 40000/- The grant promised by Govt in G.O. G.S. 10 1912

(iii) Rs 34000/- Loan from Govt.

Thus it will be seen that for the financing of this scheme Govt will have to find funds to the extent of Rs 126739 + 74000 (ii & iii supra

NOTE—Contn sheet

G R S III 2,

General and Revenue Secretariat | File No | of 191

Serial No

That is Govt. will have to provide funds
to the extent of 2 lacs for this project. The way in
which the question has been dealt with by the
Mully is really very unfair. The Mully is
not satisfied if Govt provide a moiety of the
cost of this somewhat extravagant project but
they go back to rely in addition to a promise
made by Govt under different conditions and for
a cheaper project. Why that order should be
drawn in here is not at all clear. Again
the demand for a loan of Rs 34 000/- from
State funds is another instance that the Mully
is anxious to avoid taking any individual
responsibility & raise a loan locally for
the benefit of its constituents. This plea
for throwing responsibility if conceded, create
very inconvenient precedents. The Mul el.
if they take an honest interest in this
question ought to be able to raise a loan
locally of Rs 50000/- at least. This test
is conveniently avoided, and the Mully
has not taken a fair view of the case.

To crown all, the Mully concludes by suggesting
a bargain as regards the landing ons of the
present service steamer to Govt. for irrigation
purposes, as if this will be useless to the Mully - if
the present scheme is sanctioned there is no doubt some reason in the suggestion.

~~as the Belly has~~ put a great deal on its water supply. The suggestion may be accepted if the Belly is able to finance the whole of the cost due from it, entirely from its own resources and from a loan raised locally. ~~The Belly may be informed at first with~~ the Belly may if asked be also informed that unless the full whole of the cost comes from these two sources, the scheme will not be pushed forward

After the financing question is finally settled, the Govt Board may be consulted if necessary unofficially.

(6) Returned, with compliments, to the Secretary to Government, Revenue Department.

2. It is reported that the capacity of the reservoir is about 20 units and the drainage area is very small, being only 0.19 of a square mile. Also the tank does not fill in years of normal rainfall.

3. The extent of wet land under the tank is small and it may be benefited if the reservoir is exclusively reserved for purposes of irrigation. As the tank does not fill in ordinary years, as observed above, it is doubtful if it can be of real benefit to the wet lands.

For Chief Engineer of Mysore.

9 January 1920.

Rev Secy 1) This 15.1.20

The tank is thus not of much value for irrigation purposes. The Md Council expect a sum of about Rs 29,735 from Govt for the loss by way of foregoing dues from the Council to that extent. The new Scheme is a very costly one & the problem of financing it is difficult to solve.

There is no use sanctioning an Estimate for any scheme unless there is any likelihood of it being taken up soon after it has been made and say a period of six months at the outside - As matters stand an Estimate made out six months previous to end of March probably value owing to rises in cost of labour & materials & the steadily increasing charges for labour. Improvements appear to pay a visit to Chitmagalur after the closing of the Evening Bath day season at the Capital & should take advantage of the opportunity to discuss the question with the Town Subdt. Council.

24-5-920

It is difficult to say what the exact contribution from the total Govt. provision of one lac per taluk for Water Supply Schemes during the year 1920-21 can be spent as the Municipality can provide Rs 30000 itself during 1920-21 & it is unlikely that more Expenditure can be incurred during the period. There can be no objection to start the work as to which of the four alternative Estimates submitted is to be preferred as a matter which is left to the Govt. The point to be seen is not merely the initial Expenditure but the recurring Expenditure & the provision to pay off the loan raised if any as observed by me in my previous Minute dated 26/5/20 may be deferred till my next visit to Chikmagalur after the Ensuing Birthday so as to facilitate disposal of the Pt of the Circle concerned could be present at Chikmagalur on the occasion.

The Mil Cl has framed bdt. estimate for the above mentioned work. I presume he has made by the P.W.D. also provision in budget for his provision under Water Supply Schemes. As such there cannot be any difficulty in providing funds for this Scheme in the next official year 1920-21. What I wished to discuss with the Mill. Cl of the P.W.D. was which of the four alternative schemes proposed was the most suitable for the purpose. If this point can be settled between the Mil Cl of the P.W.D. there is no need to wait for the estimate. The Engineering can make the proposal separately.

6] I would invite attention to the following points -

(a) It is not clear if the Municipality has enough annual revenues to provide for all the following charges after meeting its normal annual expenditure.-

(a) Working expenses of the scheme including depreciation charges,

(b) Interest on the public loan of about --- Rs 30,000/- which it proposes to raise I don't think the Municipality will be able to float a loan at 6 per cent.

(c) Sinking Fund for discharging the loan, and

(d) If expenditue proposed to be met from the annual savings of about Rs 10,000 expected each year has to be incurred before the savings are available, the Municipality will have to take a loan from Government and it has to pay the interest charges upon such loan.

NOTE —Coto Sheet

G R 3 [II-2]

General and Revenue Secretariat | Mul File No. 18 of 19

Serial No

(2) It is not clear in how many years the construction will be completed and what is the share of expenditure to be contributed by Government in each year of the progress of the work The aggregate grant in the current year for "Improvement of Water Supply in Towns" is Rs.75,000. How much of this provision should be spared for this Municipality is another point on which there is no information in the file

(3) The grant that can be allowed for "Improvement of Water Supply in Towns" in the next year is not likely to be large and the Chikmagalur project, if started, will have the first claim upon whatever provision for the purpose can be allowed in the budget of that year and the balance only, if any, will be available for other towns

(4) If the Municipality is capable ~~from 1 to 3 annual revenues~~ of bearing all the charges referred to under (1), and if the Government share of the project can be given from the grants for Water Supply in Towns, there is no financial objection to the proposal

Submitted with reference to para 6 of Sapna from ordinal

Final Note by the Second Member of Council

Subject

Water Supply Scheme for Chikmagalur Town.

For a very long time the town of Chikmagalur was dependent for its water supply on the old Ramanahalli Irrigation Channel, supplemented by a few wells in the town. In the year 1889 the townspeople, experiencing the water difficulty acutely, volunteered to contribute money towards a better water supply for the town.

2 Government in their order dated 21st November 1890, sanctioned a project for the construction of an impounding reservoir at a cost of Rs.50,000/- to supply the town with water, but, as the estimate proved inadequate they again sanctioned a revised estimate for Rs.78,000/-. The reservoir was completed in the year 1896.

3. Immediately thereafter, notwithstanding the completion of the reservoir the water supply therein failed completely in the hot weather of both 1897 and 1898. Other proposals were then made for improving the water supply but, they were all shelved as being impracticable.

4. Government, acting upon the suggestion of the Chief Engineer, sanctioned, in their Order No.2492-5 dated 8th October 1912, the building of a subsidiary reservoir at a cost of Rs.40,000/ This work, however, was not carried out.

5. On further representations from the townspeople regarding the great difficulty experienced for adequate water supply and urging the early preparation of the estimates for improving it, the question was referred to the Chief Engineer who thereupon submitted four alternative estimates for the scheme. Out of these the Municipal Council

have

have adopted the estimate (D) costing Rs.2,53,479/-.

6. After further correspondence regarding the method of financing the work, the Municipality have submitted a scheme, as follows, for meeting their moiety (Rs.1,26,500) towards the cost of the project -

Rs.70,000/- out of their closing balance.

" 30,000/- out of their annual savings in three instalments at " 10,000/- a year payable at the close of every year commencing from 1920-21.

Rs.26,000/- out of a loan to be floated for Rs.30,000/- in the open market.

7. The question was considered in Council and it was resolved that sanction may be accorded to the alternative scheme D.

8. The Financial Secretary, who was consulted in the matter, states that there is no financial objection to the proposal provided (1) the Municipality is capable of bearing all the maintenance, interest, and, sinking fund charges from its annual revenues, and (2) the Government share for the project can be given from the grants for water supply in towns.

9. The resolution of the Council may be graciously approved.

N O T E.

Alternative estimates for improving the Water Supply to the Chickmagalur Town Kadur District.

The Water Supply system of Chickmagalur Town which was carried out about 25 years ago, has not been quite satisfactory. The storage reservoir which was built for the purpose does not fill properly so as to last for one year, and resort has frequently to be had to an irrigation channel.(called the Ramanhalli) which is running near the town to draw the water to the town from. The distribution system is not also arranged on a proper plan, so that a great deal of water is wasted

2. To remedy this, four alternative proposals are submitted by the Superintending Engineer, Southern Circle

3 All of them may roughly be said to consist of two parts.

(1) Improvement of the source of supply and drawing water therefrom.

(2) Filtration of the water and distribution in the town.

4. The latter is common to all the estimates and they vary only in regard to the 1st part.

5. The office note of the Superintending Engineer explains the different features of the 4 estimates.

6. After examining carefully the details of all the proposals and inspecting the sites, I am of opinion that proposal D is the most suitable and I accordingly solicit sanction

7. It is

(a) to construct a low dam across the Yaruchi river

river at a point about 2 miles above the Ramanhalli, and draw water therefrom by means of C.I. pipes to the new filter beds to be constructed at the north end of the town

(2) To construct a set of settling tanks and sand ---- filters, clean-water reservoirs at the place noted above and

(3) distribute the water therefrom in the town by C.I. pipes and fountains.

8. Even the lowest flow in the Yagachi in the summer will be more than ample to meet the requirements of the - population of Chickmagalur, and a low dam across the --- river will therefore do without any storage reservoir

9. The Ramanhalli Anicut which is across the Yagachi is of course two miles nearer the town, but as the --- drawing of the water from the river at that place will interfere with vested irrigation interests, it is ------ proposed to draw the water independently of it. The --- proposed site of the dam being also at a much higher --- level compared with the town, a similar size of pipe tha what would be required from the Ramanhalli Anicut can be laid, which makes up for the longer distance of piping.

10. If a reservoir is considered necessary in course of time, the site above the dam is the place most suited for it, and the proposed dam and pipes therefrom will -- come in very handy, to draw the water from the reserwoir

11 The cost of the work as per proposal D. I estimated at Rs 2,53,479.

existing water works of the town In view of the fact that the Council have already incurred a large expenditure over the water supply of the town, and that they have to provide a heavy sum for the project under reference the prayer of the Municipal Council seems to deserve favourable consideration The favour of early orders in the matter is solicited.

3 The enclosures to the letter under reply are herewith resubmitted

I have the honor to be,
Sir,
Your most obedient servant

K Gurulardas
Offg. Deputy Commissioner,
Kadur District

Letter No 58 dated the 1st September 1919 from the President of the Municipal Council of Chikmagalur to the Deputy Commissioner, Kadur District, Chikmagalur.

With reference to your letter No M C 16/19-20 dated the 20th instant, calling for the views of the Municipal Council on certain points in the matter of improvements to the water supply to Chikmagalur, I have the honor to state as follows -

2 The scheme consists of 4 alternative proposals, A, B, C, and D, all of them have been said to consist of two parts, viz , 1 Improvement of the source of supply, and 2 Filteration of the water and distribution in the town The latter is considered by the Chief Engineer to be common to all the estimates

3 After examining carefully the details of all the proposals and inspecting the sites with me, the Chief Engineer is of opinion that proposal "D" is the most suitable and accordingly solicits sanction of Government thereto.

4 The cost of the scheme as per proposal "D is estimated by the Chief Engineer to cost Rs.2,53,479/-

6 The Government in forwarding a copy of the letter received from the Chief Engineer, together with the four alternative proposals for improving the water supply to Chikmagalur, request the views of the Council as regards the selection of one of the four proposals, financing the same, and the arrangements for providing the maintenance charges etc.

7 In this connection, I beg to explain first the financial position of the Municipality and then go to other

7 The balance at the credit of the Municipality deducting the minimum balance to be maintained as per rules is -- Rs.52,682/- plus Rs 40,000/- being the State Grant sanctioned by Government in their Proceedings No.2942-5/M1 341-08-8 dated 8th October 1912, or Rs 92,682/-. The water supply scheme as a whole is estimated to cost Rs.2,53,479/-.

9 As regards the enquiries made by Government in the matter of selection of one of the four proposals and financing the same, etc., I beg to state that the Municipal Council at their meeting convened on 30.8 19, discussed the whole question and resolved that proposal "D" as decided by the Chief Engineer is the most suitable and that it may be accepted accordingly

4 Considering the financial position of the Municipality they propose to meet the cost of the scheme as follows -

1. CONTRIBUTION FROM MUNICIPAL FUNDS		
Balance at the credit of the Municipality, Rs.92,682/-	}	Rs 1,26,739-8-0
Loan from Government to make up ¾ the share of the cost payable by the Municipality Rs 34,057-8-0.	}	
2. CONTRIBUTION FROM GOVERNMENT		Rs 1,26,739-8-0
T O T A L		Rs.2,53,479-0-0

The annual charges on account of maintenance and the repayment of loan has been resolved to be met from the water rate and the general funds of the Municipality.

The Municipality have a liability of Rs.29,745/- unpaid portion of the loan raised towards the existing water works and payable to Government as an annuity of Rs.3,300/-.

Now that the scheme as decided by the Chief Engineer is capable of meeting the demands of the town by itself and the existing reservoir will be of no use to the Municipality.

As such the Council have resolved to request the Government to take over the said reservoir to be used as an irrigation tank in lieu of the repayment of the loan.

A copy of the resolution of the Council on the subject is herewith enclosed for favour of perusal.

Read - Letter No H C 16/19-20 dated the 20th instant from the Deputy Commissioner, Kadur District, forwarding a copy of letter No 2192/M1 18-19-2 dated the 12th instant, from the Secretary to Government, together with all enclosures regarding the improvements to water supply to Chikmagalur and requesting the Municipal Council to furnish their views on all the points referred to in the letter

Resolution - Resolved that proposal "D" as decided by the Chief Engineer is the most suitable and accordingly proposal "D" be selected and sanction of Government obtained thereto.

As for financing the scheme the council details as lows -

The balance at the credit of the Municipality is 52,682/-, excluding the minimum balance of Rs 10,000/- be maintained as per rules. The Government were pleased give a State Grant of Rs 40,000/- for the improvement of his Municipality in the year 1912 in accordance with Government Proceedings No 2942-5/M1 341-08-8 dated 8th October 1922. The total amount on hand will be Rs 92,682/- The cost of the present water supply scheme is estimated to cost Rs 2,53,479 The Municipality will have to raise a loan of Rs 34,057 to make up half the cost of the present scheme, viz Rs.1,26,739 8 0.

Resolved that the Government be approached to grant a loan of Rs.34,057/- to enable the Municipality to meet half the cost of the scheme and the other half being contributed by the Government.

That the maintenance charges and the repayment of the loan be met from the water rate and the general funds of the Municipality

The Municipality have a liability of Rs.29,745/- the unpaid portion of the debt raised from Government towards the existing water works, and payable to Government in twenty yearly instalments. The new scheme as decided by the Chief Engineer is capable of meeting the demands of the town by itself, and the existing reservoir will be of no use to the Municipality

Resolved that the existing reservoir be handed over to the Government to be used as an irrigation tank, in lieu of the repayment of the loan

Rel 18-19 -5

B.Ramaswamaiya, Esquire, B.A., B L.,
Secretary to the Government of Mysore,
Revenue Department,
B A N G A L O R E .

Dir,

With reference to Government Order No R.9890/M1.18-19-4 dated the 28th February 1920 stating that the Government are not prepared to lend any money to the Chikmagalur Municipal Council for their water supply scheme, and suggesting that they should take steps to float a loan for the balance of the money required for the project, I have the honor to submit herewith a copy of letter No.H.C.235/19-20 dated the 9th instant from the President of the Chikmagalur Municipal Council, and a copy of the resolution of the Council, passed at their special general meeting held on the 8th instant on the subject.

2. It will be seen therefrom that the Municipal Council propose to meet their quota (Rs.1,26,500/-) of the cost towards the water supply project as follows -

(a) Rs.70,000/- out of the funds at their credit on the 30th June 1920, which it is expected would amount to Rs.86,000/-.

(b) Rs.30,000/- out of their annual savings, in three instalments payable at the close of every year commencing from 1920-21.

(c) Rs.26,500/- out of a loan of Rs.30,000/- which they intend to float in the open market.

As regards the first proposal, I would observe that the Municipal Council's balance in the Government Treasury on the 1st March 1920 is Rs.86,430/-, the contribution may be taken as secured.

1919-20 20:24

Enclosure No. 2.

Submits copy of letter no 4 & 23 of 19-20 dated 9-3-1920 from the President of the Chikmagalur Municipal Council, and a copy of the resolution of the Council, for the water supply scheme at Chikmagalur and requests sanction thereto

—o—

4. As regards the 2nd proposal, it is seen that the Municipal Councils' annual income is Rs.33,475/- and that its ordinary expenditure comes to Rs.19,263/-, leaving a balance of Rs.14,212/- . There does not therefore seem to be any difficulty for the Municipal Council to spare Rs.10,000/- annually for 3 years, and they may be asked to provide funds accordingly in the budget.

5. The 3rd proposal is to raise a loan of Rs.30,000/- in the open market, at 6 per cent interest with Government guarantee, and Government may be pleased to sanction the same. The Municipal Council will be asked to assign a certain item of its revenue to form a sinking fund for the liquidation of the loan in ten years and for the payment of interest annually. The draft prospectus will be submitted as soon as Government sanction to raise the loan is accorded

6. The favour of early orders is solicited as the supply of water in the town is anything but satisfactory, especially in summer.

I have the honor to be,

Sir,

Your most obedient servant,

K Srinivasa Rao

Offg. Deputy Commissioner

Kadur District.

B.S.R.

Letter No.H.C.235/19320 dated 9th March 1920 from the President Municipal Council, Chikmagalur, to the Deputy Commissioner, Kadur District.

With reference to your letter No.R.Dis.3/19-20 dated the 4th instant, forwarding a copy of Government Order stating that the Government will only contribute Rs.1,26,500/- towards the water supply scheme and that the Municipal Council should find funds for the other moiety of the cost etc., I have the honor to enclose herewith a copy of the resolution of the Council on the subject.

I further beg to state in this connection that the Municipality will have at their credit by the end of June 1920, a sum of Rs.86,000/- of which they will be able to place Rs.70,000/- at once at the diposal of the scheme As the work is expected to run through for three years, the council is of opinion that they can spare out of their current revenue at the rate of Rs.10,000/- a year for three years, which makes a total of one lakh of rupees.

Now, the Municipal Council require only Rs.26,500/- to make up their half of the cost of the scheme, and they have resolved to raise a loan of Rs.30,000/- by debenture at 6 % interest under Government security.

In these circumstances I request that you will be so good as to recommend to Government with your strong support for their security for the interest and also for the early sanction of the scheme so that the work may be commenced as early as possible.

Chikmagalur
17 . 5 . 20

Sir,

In the draft Budget received by me I see that no provision of any sort has been made for the Water supply to Chikmagalur town. When you last visited Chikmagalur you were pleased to reply to the representation made by the Municipal councillors at the time of the office inspection, in connection with the town Water supply project, that the matter would engage the serious consideration of Government.

When I took leave of you at the time of your departure from this town, you were pleased to express that I should expedite the Water supply scheme and that you would grant the required amount.

Chikmagalur town has been fighting for its water supply for the last 25 years. When the whole Project was submitted to Government for sanction they were pleased to inform the council, that they contribute only Rs. 1,26500/- and the municipal council should find their share.

Accordingly the municipal council resolved to meet their share

the notes must be copied or slips pasted on this form

by placing atonce Rs.70000/- at the disposal of Governme out of their savings, by providing Rs.10000/- every year for three years (for 3 years) and by floating a loan in the open market at 6% interest under Government guarantee.

The Government has not been pleased to sanction the scheme and no allotment is made in the Budget

I request you to kindly take this matter into your kind consideration and come to the help of Chikmagalur people for their drinking water.

I beg to remain,
Sir,

Your Most Obedient Servant

C. Veerabhadrappa
